Summer is finally on its way, we're all waiting for sweaty days and nights, some of you are also probably thinking of a nice beach, right? Well, first of all, to make you scream and dance in some hot club, here comes this great EP.

This time, we're introducing **Mimanson**, a young, talented and high promising musician from Madrid, co-founder of the "List3n Us Level" collective. In 2007, he won the "Cultura Techno Zona Sur 2007" in Madrid, and now, he surprises us with his first personal and solid work called **Escafandra**.

The **original** is a punchy Techno track that creates a great atmosphere and ambiance, especially made for the main hours on the **dancefloor**. You will experience a very effective track, perfect material for a screaming crowd asking for more dirty beats.

The remix is served by our favorite duo, **Benedetti & Bianco** coming straight from Uruguay and Argentina. They deliver us once more a great collaboration, and another vision of this track, groovy, joyous and **directly made for crazy and nasty parties**.

This EP finishes with a track called **Works**, to balance everything with deep Techno and a minimal touch. Pulsating rhythms right in your face to give a strong ending to this **stunning work**.

Darek's **third** release is coming from **three** different horizons and **three** mixed cultures, ready to surprise you and create diversity. By experiencing great sounds and talented artists, we hope that you enjoyed this groovy trip with our powerful and skilled production.
