The talented Argentinean **Junior Lopez**, who is living in Barcelona since many years, finally presents his new work named **We like to Party** on **Darek Recordings!** It's an amazing tech house track, with a great energy, fuelled with positive beats, perfect for this summer's hottest events. It includes his original composition and two very different, but highly **catchy remixes**.

One of them is delivered by Top British DJ and Producer, **Terry Francis** who is a resident at the famous and internationally renowned **Fabric** in London. He plays there and also in many other clubs around the globe since more than **10 years**, by providing the best in cutting-edge **techno** and **house** music. He pleases the most demanding clubbers who are coming to listen to his mind blowing sets and **latest productions**. His version is a strong **dancefloor bomb**, perfectly balanced between **tech house**, **techno** and that subtle touch of **acid** flavor.

Martin Huergo is also part of this adventure and to close this EP in the best way, he offered a **funky** version of this **floor filler!** It's a fun and **sexy** interpretation, with a deep atmosphere and a **classic house** feeling floating around this cool remix. Martin is very well known all over Argentina and the rest of South America for his **powerful sets**, but he's a true music lover who also likes to surprise with his **softer** and **deeper** side.

This release is a **summer special!** Perfect for the best moments of these following very **HOT** months of the year. Just picture yourself a nice cocktail in your hand; standing on the shore of the sea at a nasty **beach party**, suddenly a fresh breeze of air goes through your hair... Yeah, we're ready for the sun, let's go!
